

CHAITHANYA M

Java Backend Developer | Spring Boot | Microservices | Full Stack | REST APIs

Chennai, India | +91-6302672993 | chaithu.moorpa@gmail.com | linkedin.com/in/chaithu-moorpa | github.com/Chaithumoorpa

PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience building and maintaining Spring Boot applications for Verizon and AT&T OMA-DM Device Management platforms. Experienced in REST API development, Spring Data JPA, Hibernate, Docker deployments, production debugging, and Agile development. Strong background in backend troubleshooting, API development, and cross-functional collaboration with QA, Android, and firmware teams. Currently building two personal full-stack products, one of them live in production on AWS.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Microservices, Apache Kafka, Python, FastAPI

Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS

APIs & Architecture: REST API Design & Development, JWT Authentication, Role-Based Access Control, Design Patterns & Principles, Data Structures & Algorithms

Databases: PostgreSQL, MySQL, MSSQL

DevOps & Tools: AWS, Docker, Jenkins (CI/CD), GitHub Actions, Git, Maven, Linux, Apache Tomcat, Postman

Testing & Process: JUnit (Unit & Regression Testing), Agile/Scrum, Production Support, Root Cause Analysis, Debugging

AI Tools: GitHub Copilot, ChatGPT, Antigravity IDE

PROFESSIONAL EXPERIENCE

Software Engineer | Tech Mahindra

Dec 2023 - Feb 2026

- Developed and maintained Spring Boot REST APIs and backend services for an enterprise OMA-DM Device Management Platform (Verizon & AT&T).
- Integrated backend services with MSSQL using Spring Data JPA and Hibernate for data retrieval and command tracking.
- Investigated production issues by analyzing SyncML transactions, application logs, and MSSQL records; identified root causes, improved exception handling/logging, and validated fixes with JUnit.
- Deployed services on Apache Tomcat via Docker, built Jenkins CI/CD pipelines, and collaborated with QA, Android, and firmware teams in Agile/Scrum sprints.
- Developed reusable automation modules for firmware validation, regression execution, and device log analysis, improving debugging efficiency for Google firmware engineers.

Programmer Trainee | Cognizant

Oct 2021 - Mar 2022

- Trained in Core Java, Spring Boot, REST APIs, Hibernate, Maven, and Git; debugged Java/SQL modules for an enterprise banking project and supported unit testing using JUnit.

PERSONAL PROJECTS

Nakama - Business Management (ERP) Application

Mar 2026 - Present

- Built the REST backend for inventory, billing, orders, and staff management, with JWT login and role-based access for owners, managers, and staff.
- Designed offline data sync so shop devices keep working without internet and sync safely when back online.

SVVD Thorur - Temple Website & Admin Portal (svvdthorur.org)

Jan 2026 - Present

- Built and deployed a live temple website with online seva booking and an admin portal for donations, accounts, and content.
- Runs on AWS with Docker, PostgreSQL, and automated CI/CD deployment.

ORGANISATIONAL PROJECTS

- OMA-DM Device Management Platform (Verizon & AT&T):** Developed Spring Boot backend services following Controller - Service - Repository architecture, implementing SyncML request/response workflows, Spring Data JPA integration, and MSSQL persistence for carrier device-management operations.
- OMA-DM Test Server Platform (Internal Tool):** Built REST API endpoints for command scheduling and response processing on an internal Spring Boot test server simulating OMA-DM carrier operations for device certification and provisioning validation; developed a React-based frontend for test configuration, command triggering, and real-time response visualization.
- Google GChip Platform Automation:** Designed and developed a Python automation framework from scratch for validating Google SoC subsystems (CPU, GPU, DDR, DPU, VPU), integrating Jenkins, ADB, log parsing, and automated reporting.

EDUCATION

MCA (Computers) - Sri Venkatesa Perumal College of Engineering and Technology, Puttur | CGPA: 8.3/10

2023

B.Sc, Computer Science and Technology - Sri Venkateshwara University (SVU), Tirupati

2021
